DIRECTIONS FOR USE

Apply only as directed during the growing season.
 Use Andersons Golf Products ContecDG® Dispersing Granule Technology 7-14-14 for greens, tees and other fine turf areas. Contains magnesium to help correct or prevent deficiencies during the growing season.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will also greatly reduce ball, shoe and mower pickup - minimizing nutrient loss.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appearance. This can occur even if immediate irrigation or rainfall occurs. It is recommended that this product be applied to dry turf only.

Application Rates:

- LOW: 2.9 lbs/1,000 sq. ft.
- MEDIUM: 4.3 lbs/1,000 sq. ft.
- HIGH: 5.8 lbs/1,000 sq. ft.
- HEAVY: 7.2 lbs/1,000 sq. ft.

FLORIDA APPLICATIONS: We recommend that you follow the Florida Green Industries BMP's at http://www.flaes.org/pdf/BMP_Book_final.pdf

FLORIDA APPLICATIONS: We recommend that you follow the Florida Golf Course BMP's at <http://www.flaes.org/pdf/gfcbmp07.pdf>

For all applications: Immediately after application, for optimum results, apply a minimum of 0.12 inches of water to disperse the granules.

Recent research has shown that well-maintained turf is an effective environmental buffer that prevents pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.

Storage and Use:

Store in a clean, dry place.
 Reseal opened bag by folding top down and securing.
 Use only clean, dry spreaders.
 Do not leave unused product in spreaders.
